

Welcome to the CFG Pokemon Gym!

A TOP TRUMPS GAME
BY MICHELLE,
VERITY AND KUIL

our
game

- The ability to generate a random number from 1-151
- Using the Pokemon API, pull a card based on it's ID number.
- A dictionary that returns a Pokemons id, height, and weight
- Assign the user and computer a random Pokemon Card.

Should Have!

- Use different stats for the Pokemon from the API
- Get multiple random Pokemon and let the player decide which one that they want to use
- Play multiple rounds and record the outcome of each round. The player with most number of rounds won, wins the game
- Allow the opponent (computer) to choose a stat that they would like to compare
- Unit testing

Could Have!

- Appropriate code game theming for an immersive game experience
- HTML, CSS and JS to provide an all round visual experience
- Ability to be deployed on mobile as well as browser
- Record high scores for players and store them in a file
- User Flow diagram
- The ability to save game progress
- The ability to store overall statistics of the user
- Achievement Trophies to collect in-game

- Different API's - sole focus is Pokemon
- Log In/Account creation ability
- Paid Content - Keep Top Trumps Pokemon free for all users!
- Paywalls to access game
